

Jeremiah Archary

Full-Stack Developer | Systems & Automation

Tongaat, KZN | 072 864 1725 | jeremiaharchary23@gmail.com

Portfolio: novablur.github.io/portfolio | LinkedIn: linkedin.com/in/jeremiah-archary | GitHub: github.com/novaBlur

BSc IT graduate with robust hands-on experience engineering, maintaining, and deploying real-world web applications in production environments. Adept at full-stack feature development, complex system debugging, and workflow automation. Proven track record of spearheading migrations, building data-driven dashboards, and accelerating app performance for enterprise internal tooling.

PROFESSIONAL EXPERIENCE

Junior Developer

Sept 2026 – Present

Barrows

- Promoted to a full-time Junior Developer role to continue driving system architecture, mobile development, and internal tooling enhancements following a highly successful learnership.

Operations Developer (YES! Learnership)

Nov 2025 – Aug 2026

Barrows

- **System Architecture & Automation:** Engineered a custom Model Context Protocol (MCP) for Jira that autonomously analyzes branch/code changes to generate and comment non-technical summaries for Product Owners.
- **Mobile Development & Migration:** Spearheaded the migration of the TradeX application to Native Android and iOS, implementing critical job card management and site audit functionalities.
- **Data & Infrastructure:** Deployed a 3-phase CRON job to optimize local storage by autonomously uploading legacy images (1200+ days old) to Google Drive and dynamically updating system image links.
- **Performance Optimization:** Accelerated system performance by optimizing UOM reports' Excel download times and significantly improving data/image retrieval speeds for the Form Builder application.
- **Version Control Migration:** Successfully migrated mission-critical repositories (*form-builder*, *logistics-planner*, *trade-x-6*) from Bitbucket to GitHub.
- **Data Visualization:** Developed and integrated 5 robust Tableau dashboards into the TMC Toolbox, alongside a custom Redbull dashboard and a dispatched vs. form-builder asset tracking dashboard.
- **Application Maintenance:** Continuously maintained internal enterprise systems (Barrows OS, TMC Toolbox) leveraging Docker containerization, n8n automation, and SonarQube for code quality enforcement.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS, SCSS, SQL

Tools &

Platforms: Docker, Git, GitHub, Bitbucket, n8n, Retool, Tableau, Infisical, Open Metadata, SonarQube

Mobile Dev: Native Android, iOS

Systems & IT: REST APIs, CRON Jobs, Linux Basics, Networking (DNS, DHCP)

FEATURED PROJECTS

Unified Dashboard Study Planner + Note Taker

- Engineered a unified study planner featuring rich-text notes, subject progress donuts, drag-and-drop organization, and an integrated Pomodoro timer to boost productivity.

Java Task Manager

- Developed a robust task manager application (Console & GUI) featuring task creation, advanced search, completion tracking, and persistent file I/O operations.

Oyoma Restaurant Website

- Designed and deployed a responsive landing page with integrated Google Business profiles to successfully boost local online visibility and customer access.

Project Aegis (Quantum IT Research)

- Researched and conceptualized a Post-Quantum Encryption Self-Hosted Vault to future-proof data security against advanced cryptographic threats.

EDUCATION

Bachelor of Science in Information Technology

2023 – 2025

Richfield Graduate Institute of Technology

- **Academic Performance:** Year 1 GPA: 84.82% | Year 2 GPA: 76.80% | Year 3 GPA: 75.42%

Bachelors Pass Grade 12

2021

Brettonwood High School
